

SEDARI

THE COLLECTION

SEDARI shapes experiences through sculptural design, creating a sense of belonging that makes a space feel like home. Each piece is an exploration of proportion, texture and the relationship between the body and the objects that surround it.

Our design language brings architectural clarity to generous, enveloping forms. Curves soften a silhouette. A deliberate line gives it definition. The balance is felt as much as it is seen, in the ease of a seat and the quiet assurance of its presence.

Material gives this language its warmth. Layered textures, expressive surfaces and considered tones invite a closer encounter, revealing their character through touch and changing light.

Across the collection, distinct silhouettes share a sense of calm. Each is conceived to hold its own within a room while becoming part of the life around it. This is the feeling at the heart of SEDARI, a home with character, a place to settle, and pieces that become familiar through everyday use.

Arco

Soft contours. A striking balance.

SEDARI

BESPOKE

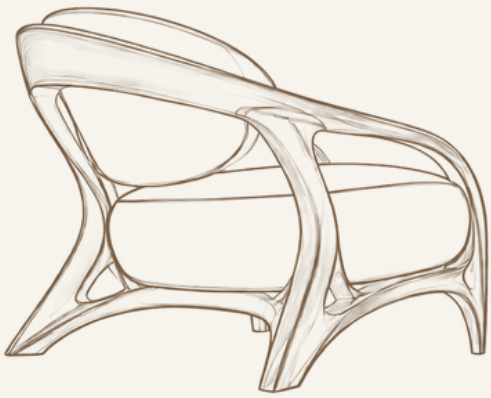

Every commission is an individual expression of form, material and place. Designs from the collection may be reinterpreted in their proportions, dimensions and finishes, with materials selected to complement the architectural character of an interior.

Beyond the collection, SEDARI realises original pieces from designers' sketches, drawings and specifications. Each detail is developed around the intended silhouette, precise measurements and chosen materials, preserving the integrity of the original vision.

We work closely with designers, architects and private clients on individual pieces and coordinated interiors. Material studies, finish selections, drawing development and samples inform a proposal tailored to the project.

For bespoke commissions and project enquiries, we invite you to share your vision with SEDARI. Our team welcomes the opportunity to explore individual concepts, material selections and tailored solutions in collaboration with you.
